(a) Bounds on the value distribution
naive: losing
bids as values
$\hat{F}^+$
$\hat{F}^-$
true F
$F(v)$
value v
(b) Bounds on the optimal reserve ($v_0 = 0$)
r^-
r^+
true π
$\hat{\pi}_2$
$\hat{\pi}_1$
$\pi(r) = (r - v_0)(1 - F(r))$
reserve price r
